### **Xpress Product Development Group, Ltd. (XPDG) introduces Complex Injection Molded Parts in days via Rapid Injection Tooling (RIT)**

[Xpress Product Development Group, Inc. \(XPDG\)](#) is excited to introduce Rapid Injection Tooling (RIT). This exciting new process provides complex injection molded parts in 5-11 days (with a maximum part size of 170mm X 280mm X 70mm). RIT can accommodate undercuts (internal and external), complex details and features, and polished or textured surface finishes producing production quality injection molded parts. A wide variety of thermoplastic and engineering plastic resins are available including glass-filled and high temp materials. Mold materials including aluminum and steel are used for RIT construction, yielding tool lifes from 1,000 to 100,000 shots. Over-molding and insert molding are also available via RIT.

Tony Moran, Managing Director of XPDG commented, “The RIT Process is a tremendous break through in the Rapid Tooling sector, eliminating the many limitations of competing processes. RIT makes parts the way our customers design them, not the way our process limits them. RIT is a great example of XPDG’s continuous development of innovative services and technologies that help our customers rapidly develop better products.”

XPDG has been beta testing and expanding capacity for the RIT process for the past two years. XPDG customers have extensively utilized RIT for clinical, prototype, short-run, and production builds. Quotes for the RIT process can be sent to [Quotes@XPDG.com](mailto:Quotes@XPDG.com), all formats of 3D data are accepted.

#### **About XPDG**

Xpress Product Development Group, Ltd. (XPDG) is a manufacturing and product development firm with quality, speed and customer service at the core of our corporate culture.

XPDG serves a global clientele in the automotive, computer, consumer products, healthcare and industrial equipment industry. The diverse customer requirements are met through our team of highly-skilled engineering and manufacturing professionals. XPDG provides the turnkey solutions that combine development and manufacturing into one seamless process.

XPDG is headquartered in the UK. For more information contact XPDG via e-mail at [Quotes@XPDG.com](mailto:Quotes@XPDG.com) or the web at [www.XPDG.com](http://www.XPDG.com).
