

Production and Contract Manufacturing

XPDG provides world-class production parts and contract manufacturing combined with complete logistic and program management services. We are able to offer lower total production costs by utilising our ISO:9001 Certified manufacturing facilities located throughout China. With over 200 injection machines, and fully-equipped tooling shops at each facility, XPDG can quickly move your projects into full production.

In addition to production injection moulding, we offer sheet metal, die-casting, complete secondary operations, and assembly. Our global team will support your logistic and supply chain management requirements.

- Global Program Management Teams
- Design for Manufacturing (DFM)
- Injection Moulding (including IMD, 2-shot, Overmoulding)
- Die Casting
- Sheetmetal
- Finishing
- Assembly
- Packaging
